

CALOCUS-CASII

Child and Adolescent Level of Care/Service Intensity Utilization System

CALOCUS-CASII is a Practical and Powerful Tool

The Child and Adolescent Level of Care/Service Intensity Utilization System (CALOCUS-CASII) is a standardized assessment tool for mental health providers, other child serving system providers, care coordinators, insurance benefit administrators, and mental health advocates who provide services for children and adolescents from ages 6 to 18 in the U.S. and other countries.

You can use this tool with varying populations with mental health challenges, including those with medical, substance use, and developmental co-occurring disorders.

CALOCUS-CASII helps you to:

Assess treatment effectiveness at the systems level and advocate for needed services.

Measure treatment and intervention outcomes at both the child and family, and systems levels.

Support active participation by child and family.

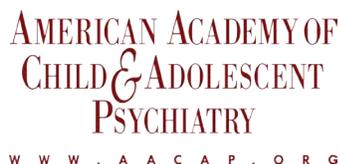

Create comprehensive, strength-based individualized, and coordinated service/treatment plans that best match child and family needs and strengths.

Speak a common language across a diverse array of persons served, providers, and payers.

Online Training is Convenient and Flexible

CALOCUS/CASII Training is Easy to Use and Practical

The five self-paced online CALOCUS/CASII training modules streamline learning and include features like sidebar menus, audio training with transcripts, glossary, downloadable electronic resources, and “practice as you learn” vignettes and case studies. The modules bookmark where you left off, so you can take them in short sessions, whenever you have time.

Vignettes

To start a vignette, select the child's photo. You must complete Laura's vignette before you can view Carl's.

Download the CASII Anchor Point Quick Reference Sheet. Use that reference sheet to review the anchor points for each dimension.

Laura's Composite Score

Based on the dimension scores, what is Laura's composite score?
Enter the score in the box below. Then, press Submit.

Dimension	Score	Dimension	Score
I. Risk of Harm	4	V. Resiliency and/or Response to Services	4
II. Functional Status	4	VI. Involvement in Services (Include only the higher score.)	3
III. Co-Occurrence of Conditions	3	A. Child or Adolescent	3
IV. Recovery Environment	4	B. Parent and/or Primary Caregiver	4
A. Environmental Stress	4		
B. Environmental Support	4		

Composite CASII score

Enhance Your Practice, Measure and Improve Outcomes

Once trained, you'll use CALOCUS/CASII to methodically:

- Determine appropriate level of service intensity that best addresses identified needs and strengths.
- Review and consider a wide variety of available clinical and non-clinical service options.
- Communicate recommendations and monitor progress.
- Apply the Systems of Care approach.
- Assess current status and goals.
